Name: _____ Catalog No: 103-60-65
Latitude: 55° 25' ~~08~~" 07" Former Stream No: 180 B ADE
Longitude: 133° 01' ~~44~~" 54" Previous No. 70
Geodetic Map No: Craig B-4 Work Area: Ketchikan
Location: North head of Doyle Bay; 2-1/4 Watershed Length: 1 mile
mi southeast of Pt. Miraballes; west shore Drainage Area: 1.1 sq mi (polar planimeter)
of Prince of Wales Island Water Supply Type: runoff from low wooded
hills and scattered muskegs
Trails & Survey Routes: lower portion of stream easily walked

Aerial Survey Notes: mouth and intertidal counts only; mouth counts for this and the other three streams at the head of the bay are sometimes grouped together

Anchorage: near the stream mouth

Tide Stage when Surveyed: 1/2

RESOURCES

COMMERCIAL FISHERIES (species, escapement, timing, spawning area):
pink, chum and coho; good rearing for coho in the pool areas; excellent in the lake

Spawning area: 5465 meters² (2640'x20'x100%ASA) + (2640'x12'x25%ASA)

Schooling Areas: on the shallow flats at the head of the bay

Spawning Areas: there are excellent spawning areas in the lower half of the stream

SHELLFISH POTENTIAL: hardshell clams present on large gravel flats at head of bay

SPORT FISHERIES: good rearing for coho; limited by lack of area; possibly cutthroat in the lake

LAND USE (history, present, proposed): unknown; presently in a natural state

REHABILITATION POTENTIAL: none needed

SOILS: generally stable in the lower half; cutbanks and braided areas in the upper half

GAME RESOURCES (species, use, habitat): deer and bear in the area
